

# LAYER FEED ASSORTMENT

DE HEUS KENYA

# INTRODUCTION

At De Heus Kenya, we provide high-quality nutrition to support healthy, productive animals. Our feeds are developed through years of research and practical experience, covering every growth stage. We offer three main product groups. Complete feed, concentrates, and chick speciality feed.

## COMPLETE FEED

Our complete feed is a ready to use, fully balanced diet that provides all essential nutrients: energy, protein, vitamins, and minerals all in one product. It ensures consistent animal performance and quality, while saving farmers the time and effort of mixing ingredients themselves.

## CONCENTRATES

Our concentrates are nutrient-rich products that supply essential micro-nutrients like proteins, vitamins, minerals, and amino acids. Farmers mix them with locally available raw materials, such as maize or other energy sources, to create flexible rations. This approach allows for cost efficiency and reliable animal performance.

## CHICK SPECIALITY FEED

Our chick feed provides specially formulated nutrition for young chicks during their early growth. It supports strong early growth and development for the perfect start.

# LAYER COMPLETE FEED

Our complete layer feeds provide **balanced, ready-to-use** nutrition for every stage of growth, designed to meet the needs during the rearing and production stages of your layer bird's life. Formulated with **optimal nutrient levels**, our feeds simplify feeding while supporting hen health, egg production, and overall performance. With our expertise in layer nutrition, we help farmers achieve **consistent** and **profitable** results with confidence.

## OUR COMPLETE PRODUCT RANGE

Product	Standard layer feed program	Galdus layer feed program
Galdus Prestarter High Altitude		0 - 1 weeks
Chick Starter Feed Crumble	0 - 5 weeks	1 - 5 weeks
Pullet Grower Feed Mash	6 - 12 weeks	6 - 12 weeks
Pullet Developer Feed Mash	13 - 16 weeks	13 - 16 weeks
Pre-layer Feed Mash	17 - 18 weeks	17 - 18 weeks
Layer 1 Feed Mash	19 - 49 weeks	19 - 49 weeks
Layer 2 Feed Mash	50- 70+ weeks	50 - 70+ weeks

## FEEDS THAT SUPPORT STRONG, HEALTHY LAYERS

Our complete layer feed is designed to deliver balanced, consistent nutrition during rearing and production. Our rearing feeds ensure that growth and development of your young pullets is supported at each stage to ensure that they reach productive age at the correct body weight to support high productivity during the laying period. Each feed provides all essential nutrients in the right proportions, so farmers can focus on flock management without worrying about balancing rations or missing key nutrients.

### What you can expect from our layer feed:

- Balanced nutrition for every life stage
- Ready-to-use feeds for convenience
- Optimal growth and egg production
- High digestibility for efficient feed use
- Supports strong and quality eggs
- Healthy, productive birds
- Consistent growth and reliable eggs

## GALDUS PRESTARTER HIGH ALTITUDE

- Soft mini pellet for optimal feed intake
- Supports early development digestive tract
- Leads to higher slaughter weight or higher egg production

### FOR CHICKS FROM 0 - 1 WEEKS

Galdus high altitude prestarter delivers an optimal start for an optimal production for your broiler and layer chicks also if your farm is situated at high altitude. Galdus makes sure your chicks receive the right ingredients in the right dietary balance thereby preventing ascites and reducing mortality. Your chicks develop in the most optimal and healthy way during the first week of life, which form the basis for the highest productivity during the following growth stages.

## CHICK STARTER FEED CRUMBLE

- Easy-to-eat crumble form for chicks' small beaks
- Promotes strong immunity and healthy early growth
- Ensures uniformity and smooth grower transition

### FOR CHICKS FROM 0 - 5 WEEKS

Chick Starter Feed Crumble provides highly digestible nutrients including protein, energy, vitamins, minerals, and amino acids to support rapid growth and feather development in young chicks. The crumble form makes it easy for chicks to eat and digest, ensuring they get consistent nutrition for a healthy start. This feed strengthens immunity, builds strong bones, and sets the foundation for productive birds later on.

Crumble

**Product code:**

701002

## PULLET GROWER FEED MASH

- Ensures steady, healthy growth without overweight risks
- Promotes flock uniformity and reduces variability
- Builds a foundation for reproductive system to develop later

### FOR PULLETS IN THE MIDDLE GROWTH STAGE FROM 6 - 12 WEEKS

Pullet Grower Feed Mash delivers a balanced mix of protein, energy, vitamins, and minerals at levels designed to sustain steady growth without excessive fat deposition. It strengthens the pullets immune system, encourages uniform body weight, and prepares the pullets for the next phase of development.

This stage is critical to setting the right growth pace before transitioning to the developer and pre-lay stages.

Mash

**Product code:**

704000

## PULLET DEVELOPER FEED MASH

- Builds a strong skeleton and muscle structure
- Promotes flock uniformity for smooth transition to laying
- Prepares pullets' reproductive system for future egg production

### FOR LAYERS FROM 13 - 16 WEEKS

Pullet Developer Feed Mash is designed to prepare the reproductive system for the onset egg production. By developing pullets properly at this stage, you set the foundation for healthy layers that will achieve high egg production later.

Mash

**Product code:**

703000

## PRE-LAYER FEED MASH

- Prepares birds for a strong and uniform start to laying
- Builds calcium reserves for better shell quality later
- Reduces stress and mortality at the onset of lay

### FOR PULLETS IN THE TRANSITION STAGE FROM 17 - 18 WEEKS

Pre-Lay Feed Mash prepares young pullets for egg production and is the first ration to increase calcium levels in preparation for onset of lay while balancing other essential nutrients. This feed strengthens bones and builds calcium reserves needed for strong eggshells once laying begins. By supporting healthy bone development and proper nutrition balance, the feed helps pullets transition smoothly into laying with less stress and sets them up for consistent egg production.

704000

## LAYER 1 FEED MASH

- Boosts peak egg production
- Improves shell strength and reduces cracks
- Maintains bird health and condition during high demand

### FOR LAYERS FROM 19 - 49 WEEKS

Layer 1 Feed Mash is designed for hens at their peak laying period when they need high-nutrient feed for maximum egg production. This balanced feed helps maximize egg numbers while maintaining consistent egg size and quality. The feed supports birds through their most demanding production phase by providing the right levels of protein, energy, minerals, and vitamins they need for top performance.

**Type of product:**

Mash

**Product code:**

715000

## LAYER 2 FEED MASH

- Prolongs laying persistency by supporting sustained egg output
- Improves shell quality to reduce cracks and losses in late lay
- Promotes long-term health and performance

### FOR LAYERS FROM 50 - 71+ WEEKS

Layer 2 Feed Mash is formulated for older hens that produce larger eggs, while producing fewer eggs than in the first 50 weeks of egg production. This balanced feed supplies additional calcium for larger eggs while regulating body weight, supporting bird health during the late-laying phase. It contains adjusted levels of energy, protein, amino acids, vitamins, and minerals to optimize egg quality and keep birds in good condition, plus natural pigments for rich yellow yolks.
