

**BROILER FEED
ASSORTMENT**

DE HEUS KENYA

INTRODUCTION

At De Heus Kenya, we provide high-quality nutrition to support healthy, productive animals. Our feeds are developed through years of research and practical experience, covering every growth stage. We offer three main product groups. Complete feed, concentrates, and chick speciality feed.

COMPLETE FEED

Our complete feed is a ready to use, fully balanced diet that provides all essential nutrients: energy, protein, vitamins, and minerals all in one product. It ensures consistent animal performance and quality, while saving farmers the time and effort of mixing ingredients themselves.

CONCENTRATES

Our concentrates are nutrient-rich products that supply essential micro-nutrients like proteins, vitamins, minerals, and amino acids. Farmers mix them with locally available raw materials, such as maize or other energy sources, to create flexible rations. This approach allows for cost efficiency and reliable animal performance.

CHICK SPECIALITY FEED

Our chick feed provides specially formulated nutrition for young chicks during their early growth. It supports strong early growth and development for the perfect start.

COMPLETE FEED..... 4

BROILER COMPLETE FEED

Our complete broiler feeds are pelleted to encourage feed intake and provide balanced, ready-to-use nutrition for every stage of growth, from day-old chicks to market-ready birds. Formulated with optimal nutrient levels, our feeds simplify feeding while supporting bird health, growth, and overall performance. With our expertise in broiler nutrition, we help farmers achieve **consistent, profitable** results with confidence.

OUR COMPLETE PRODUCT RANGE

Product	Standard broiler feed program	Galdus broiler feed program
Galdus Prestarter High Altitude		Min. first 5 days - 10 days
Broiler Starter Crumble	0 - 14 days	6 - 14 days
Broiler Grower Pellet	15 - 28 days	15 - 28 days
Broiler Finisher Pellet	29 days - market age	29 days - market age

FEEDS THAT SUPPORT STRONG, HEALTHY BROILERS

Our complete broiler feeds are designed to deliver balanced, consistent nutrition for every stage of growth and production. Starter and grower feeds help chicks develop strong, healthy bodies, while finisher feeds support optimal growth, performance, and overall well-being in market-ready birds. Each feed provides all essential nutrients in the right proportions, so farmers can focus on flock management without worrying about balancing rations or missing key nutrients.

What you can expect from our broiler feed:

- Balanced nutrition for every life stage
- Ready-to-use feeds for convenience
- Optimum nutrient levels for growth and health
- High digestibility for efficient feed use
- Supports strong muscles and quality meat
- Healthy, productive birds
- Consistent growth and reliable results

GALDUS PRESTARTER HIGH ALTITUDE

- Soft mini pellet for optimal feed intake
- Supports early development digestive tract
- Leads to higher slaughter weight or higher egg production

FOR CHICKS FROM 0 - 10 DAYS

Galdus high altitude prestarter delivers an optimal start for an optimal production for your broiler and layer chicks also if your farm is situated at high altitude. Galdus makes sure your chicks receive the right ingredients in the right dietary balance thereby preventing ascites and reducing mortality . Your chicks develop in the most optimal and healthy way during the first week of life, which form the basis for the highest productivity during the following growth stages.

BROILER STARTER CRUMBLE

- Highly digestible nutrients for fast early growth
- Strengthens bones, gut development and supports immunity
- Crumble form encourages feed intake from day 1

FOR BROILERS FROM DAY 1 TO AROUND 14 DAYS OF AGE

Broiler Starter Crumble is specially formulated with highly digestible proteins, balanced energy, essential amino acids, vitamins, and trace minerals to give chicks the best possible start in life. The crumble texture makes it easy for young chicks to consume and digest, encouraging uniform feed intake. This feed promotes strong skeletal and gut development, boosts immunity, and lays the foundation for healthy growth and high productivity throughout the bird's life.

BROILER GROWER PELLET

- Balanced protein and energy for uniform growth
- Supports strong bones and healthy muscle development
- Pellet form improves feed efficiency and reduces waste

FOR BROILERS FROM ABOUT 15 TO 28 DAYS OF AGE

Broiler Grower Pellet provides the ideal balance of protein, energy, and essential amino acids to support steady body weight gain, skeletal development, and muscle formation during the critical mid-growth phase. This feed is pelleted to encourage maximum feed intake and reduce feed wastage, ensuring nutrient intake to support high growth. This feed bridges the transition from starter to finisher, preparing broilers for optimal performance in the final stage.

BROILER FINISHER PELLET

- High-energy formulation for rapid weight gain
- Pellet form enhances feed intake and reduces feed wastage
- Optimizes carcass quality and market readiness

FOR BROILERS FROM AROUND 29 DAYS TO MARKET AGE

Broiler Finisher Pellet is a high-energy feed designed to support rapid growth and efficient muscle development in the final stage before market. The pellet form improves feed intake, reduces waste, and ensures uniform nutrition for all birds. With balanced protein, energy, amino acids, and vitamins, it helps broilers reach market weight cost-effectively.
