SOEB mash	%	3,3	3,5
FCP-1 mash	g	57,3	63,9
FCH-1 mash	g	164,7	172,2
Calcium	%	1,0	0,9
Phosphor tot	%	0,6	0,7
Potassium	%	0,9	0,9
Sodium	%	0,2	0,2
Magnesium tot	%	0,3	0,4
Vit A add (30672a)	IU/kg	8000,0	8000,0
Vit D3 add (3a671)	IU/kg	2530,0	2530,0
Cu	mg/kg	17,8	18,4

### Important

Note: Mixing directions can change depending on the price and quality of local available raw materials.

- To achieve good results, follow these mixing instructions exactly! Do not alter or change without consult.
- Always make sure all cows have access to ad libitum forages/silages.
- Make sure cows always have access to fresh, cool and clean water.
- The amount of feed for a cow is depending on production level. HP Dairy meal is for cows producing >20L/day.
- The Dairy meal intake is 3 kg up to 6L milk production/head/day.  
Dairy meal intake > 6L of milk production/head/day is 1 kg dairy meal per 2L milk production, up to a max of 12 kg intake/day.
- Dry cows should get 2-3kg/day next to ad libitum low/medium fibre rich forages
- Before weaning, calves should have ad libitum access, at weaning min preferably 2kg/day
- For more advice, ask the local Koudijs representative.
