

**PIG FEED
ASSORTMENT**

DE HEUS KENYA

INTRODUCTION

At De Heus Kenya, we provide high-quality nutrition to support healthy, productive animals. Our feeds are developed through years of research and practical experience, covering every growth stage. We offer three main product groups. Complete feed, concentrates, and speciality piglet feed.

COMPLETE FEED

Our complete feed is a ready to use, fully balanced diet that provides all essential nutrients: energy, protein, vitamins, and minerals all in one product. It ensures consistent animal performance and quality, while saving farmers the time and effort of mixing ingredients themselves.

CONCENTRATES

Our concentrates are nutrient-rich products that supply essential micro-nutrients like proteins, vitamins, minerals, and additives. Farmers mix them with locally available ingredients, such as maize or other energy sources, to create flexible rations. This approach allows for cost efficiency and reliable animal performance.

SPECIALITY PIGLET FEED

Our piglet feeds provide carefully balanced nutrition for their early growth stages. They support healthy digestion, strengthen immunity, and promote optimal growth. Highly digestible and tasty, these feeds are nutritionally balanced to ensure a smooth transition from milk to solid feed.

COMPLETE FEED..... 4

PIGS COMPLETE FEED

Our complete pig feeds provide **ready-to-use, balanced nutrition** for every stage of growth. From piglets to sows and fatteners. Formulated with **optimum nutrient levels**, our complete feeds simplify feeding while supporting animal health, growth performance, and **meat quality**. With our expertise in pig nutrition, we help farmers achieve reliable, **profitable results** without compromise.

OUR COMPLETE PRODUCT RANGE

Piglet Nurse Meal

Piglet Creep Crumble (5 - 10 days)

Piglet Starter Pellet (10 - 30 KG BW)

Pig Grower Pellet (25 - 60 KG BW)

Pig Finisher Pellet (> 50 KG BW)

Gilt Rearing Pellet

Sow Gestation Pellet

Sow Lactation Pellet

FEEDS THAT SUPPORT STRONG, HEALTHY PIGS

Our complete pig feeds are designed to deliver consistent, balanced nutrition from start to finish. Specially formulated prestarter and starter feeds give young piglets a strong start right after weaning, while grower, finisher, and sow feeds support performance throughout the production cycle. These feeds combine all necessary nutrients in the correct proportions, so farmers can focus on management without worrying about mixing or missing components.

What you can expect from our pig feed:

- Balanced nutrition for every life stage
- Ready-to-use feeds for convenience
- Optimal nutrient levels for growth and health
- High digestibility for efficient feed use
- Improved meat quality
- Healthy, productive pigs
- Consistent growth and reliable results

PIGLET NURSE MEAL

- Complete milk replacer
- Reduced mortality
- Healthy weight gain

NURSE MEAL FOR PIGLETS FOR ADDITIONAL USE OR FULL REPLACEMENT

The Nurse Meal is developed to fully replace sows milk in case the sow is not able to nurse or for additional feed to support growth and decrease mortality. The milk consists of high-quality, easily digestible ingredients that ensure a healthy start for your piglets. The high palatability ensures high intake and increases piglet weight very effectively.

PIGLET CREEP CRUMBLE

- Stimulates early feed intake
- Supports gut health
- Uniform growth & less stress

FOR PIGLETS FROM 5–10 DAYS OF AGE UNTIL A MAXIMUM OF TWO WEEKS AFTER WEANING.

Piglet Creep Crumble is an easy-to-eat first feed that gets piglets started on solid food early. Made with milk ingredients and quality proteins, it bridges the gap between the mother's milk and starter feed. The small crumble size makes it easy for young piglets to eat and digest, which helps their gut develop properly and reduces weaning stress. This feed helps all piglets in the litter grow evenly and makes the switch to weaning feed much smoother. Ensure a good water supply for piglets prior to weaning.

PIGLET STARTER PELLET

- High level of amino acids
- Better feed intake
- Good digestibility

FOR PIGLETS FOR EARLY DEVELOPMENT AFTER WEANING (10-30 KG BW)

Piglet Starter Pellet helps piglets with early development. This feed supports healthy gut development, boosts immunity, and encourages strong, even growth to help piglets fight off common weaning illnesses. It contains a higher level of amino acids, which promote better intake and improved digestibility, giving young piglets the essential building blocks they need. The pellet form makes it more appealing for piglets to eat, reduces waste, and ensures every piglet gets consistent nutrition.

PIG GROWER PELLET

- Supports rapid growth and muscle development
- Builds strong bones
- Improves feed efficiency

FOR PIGS AFTER THE STARTER STAGE (FROM 25 - 60 KG BW)

Pig Grower Pellet helps piglets transition into strong, fast-growing young pigs. With balanced protein and energy, this feed builds muscle efficiently while keeping good body condition. The feed includes minerals and vitamins that strengthen bones, boost immunity, and prepare piglets for the finishing phase. The pellet form ensures even feeding and better feed conversion, which reduces waste and gives you better value for your money.

PIG FINISHER PELLET

- Uniform pigs
- Optimizes lean meat deposition
- Gets pigs to market weight faster

FOR THE FINISHING STAGE (> 50 KG BW)

Pig Finisher Pellet is a high-energy feed tailored for the growth and fattening needs of finishing pigs. It provides the required energy, amino acids, vitamins, and minerals to promote rapid lean muscle growth.

GILT REARING PELLETT

- Builds strong skeletons
- Supports reproductive development
- Promotes long-term sow productivity

FOR REPLACEMENT GILTS FROM 50 KG BW THROUGH BREEDING AGE

Gilt Rearing Pellet gives young gilts the balanced nutrition they need to grow properly and develop strong bones without getting fat. Enriched with high-quality protein, essential amino acids, vitamins, minerals, and trace elements. This feed helps gilts build the right body condition and supports their reproductive development so they are ready to breed successfully. With proper nutrition during rearing, your gilts will transition smoothly into breeding and stay productive.

SOW GESTATION PELLETT

- Promotes healthy fetuses
- Maintains optimal body condition
- Supports easy farrowing

FOR SOWS DURING PREGNANCY. FROM WEANING TILL SERVICE

Sow Gestation Pellet is a carefully balanced feed that provides the right level of energy, protein, fiber, vitamins, and minerals to meet the specific needs of pregnant sows. The feed helps control body weight gain, prevents over-conditioning, and ensures proper skeletal and muscle development of the unborn piglets. The feed promotes steady energy release and satiety, which keeps sows calm, healthy, and ready for farrowing, while also building body reserves needed for milk production in the next phase.

SOW LACTATION PELLET

- Boosts milk yield
- Keeps sows fits
- Extends sow longevity

FOR SOWS DURING THE LACTATION PERIOD. FROM DAY 110 OF GESTATION TILL WEANING

Sow Lactation Pellet is a high-energy feed for nursing sows. This feed helps your sows produce more milk, stay in good condition while nursing, and maintain their appetite and gut health. With this feed, your sows will breed back successfully, produce healthy fast-growing piglets, and with low piglet mortality. Optimal ration between energy and protein, both needed for body condition and milk production. Both, and also minerals are higher than in gestation.
