LAYER COMPLETE FEED ASSORTMENT

Week # 1 2 3 4 5

GALDUS
PRESTARTER HIGH ALTITUDE
0-1 WK

Gives broiler and layer chicks balanced nutrition for a healthy start on high-altitude farms. It helps prevent ascites, reduces mortality, and supports early growth for better productivity.

AND

CHICK STARTER
FEED CRUMBLE
1-5 WKS

Provides protein, energy, vitamins, minerals, and amino acids for rapid chick growth and feathering. The crumble format aids digestion, supports immunity, bone strength, and prepares birds for healthy productivity.

6 7 8 9 10 11 12

PULLET GROWER
FEED MASH

This formula provides protein, energy, vitamins, and minerals to support steady growth, strong immunity, and even body weight. It prepares pullets for developer and pre-lay stages by promoting optimal progress.

13 14 15 16

PULLET DEVELOPER
FEED MASH

Pullet Developer Feed Mash is designed to prepare the reproductive system for the onset egg production. By developing pullets properly at this stage, you set the foundation for healthy layers that will achieve high egg production later.

17 18

PRE-LAYER
FEED MASH

Pre-Lay Feed Mash helps young pullets prepare for egg production by increasing calcium levels and balancing nutrients. It strengthens bones, builds calcium reserves for strong eggshells, and promotes a smooth transition into consistent laying with minimal stress.

19 - 49

LAYER 1
FEED MASH

This feed is designed for hens at peak laying, supplying the nutrients needed for maximum egg production and consistent quality. Its balanced formula delivers protein, energy, minerals, and vitamins to support performance during demanding periods.

50 - 70+

LAYER 2
FEED MASH

Formulated for older hens producing larger, fewer eggs, this feed provides added calcium, balanced nutrients, and natural pigments to support health and yolk quality in later laying stages.
